

ASP .NET DEVELOPER

Anjan Lamichhane

I'm a dedicated computer engineering student with a passion for technology. I love problem-solving, coding, and learning about the latest tech trends. I'm excited to make a positive impact in the tech world.

ACHIEVEMENTS

NCIT HACKFEST 2024

During my academic journey as a Computer Engineering student, I actively participated in the NCIT Hackfest, an experience that significantly enriched my technological skill set. Engaging in this event allowed me to immerse myself in hands-on challenges and explore the latest developments in the tech realm. This firsthand encounter not only sharpened my technical abilities but also exposed me to diverse practical applications. Eager to apply this newfound knowledge, I am ready to contribute my tech-savvy and innovative perspective to future projects and challenges in the field of computer engineering.

TRAINING/CERTIFICATIONS

Technopreneurship

NCIT / 2023

I'm Anjan Lamichhane, a Computer Engineering student with a knack for blending tech and entrepreneurship. Recently completed some cool technopreneurship training at NCIT, diving into diverse business ideas. Passionate about innovative solutions and eager to bridge the gap between technology and business. Excited about the journey ahead!

ASP.NET Training Course

Broadway Infosys / 2024

Certificate No. : B19994

I completed a training class in ASP.NET Core at Broadway Infosys, where I gained hands-on experience in building web applications using modern development frameworks. During this training, I developed projects like a Venue Booking System and a Console Calculator Application, which enhanced my understanding of backend development, C#, and ASP.NET Core fundamentals.

EDUCATION

Bachelor in Computer Engineering

Nepal College of Information Technology / Lalitpur / August, 2020 - Present

Secondary Education (+2)

Rastriya Secondary School / Pokhara / August, 2018 - May, 2020

PROJECTS

Simple Bookshop Management System

CONTACT

SKILLS

- HTML,CSS and Basics JS
- Programming Language: C#, SQL
- Framework: ASP .NET core, .NET
- Team Work
- Communication
- Problem solving
- Version Control: Github

LANGUAGE

Nepali

English

Programming language : C, C++,
C#, HTML, CSS, JS, ASP.NET Core

Technology used : JAVA, mySQL

This is the project that I have done in my college minor project where I have used JAVA as a programming language and SQL as database.

This project allows bookshop owner to manage buy and sell the books, see the history and look after available books in his/her shop.

Console Calculator Application

I developed a Console Calculator Application using C# as part of my learning journey. This project allowed me to grasp essential programming concepts such as control flow, data types, and basic arithmetic operations in C#. It enhanced my understanding of object-oriented programming and sharpened my problem-solving skills.

Web Application Venue Booking system

Technology Used : ASP .Net Core, Ms SQL Server, C#, basics of Js (ajax and jquery)

The project Venue Booking system is a web-application designed to streamline various aspects of venue reservations. The system can include a range of features, including centralized booking, automated booking confirmation and reminders, user reviews and ratings, and secure payment gateways. The Project is using ASP.NET core in MVC pattern. While working on this project I have learn many more things like what MVC pattern is, How to connect frontend and backend, how can we pass payload in backend, for database connection I have use dapper, Concepts of OOPS, basics of Javascript (i.e ajax and jquery), HTML & CSS and so on.
